

## SELF-ADHESIVE VENTILATION GRIDS

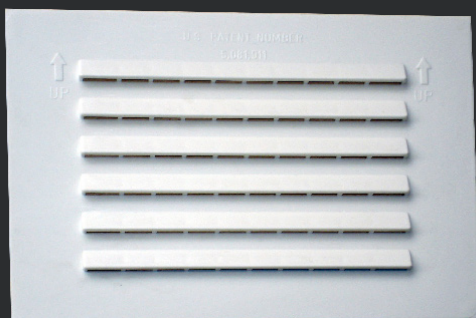

POUR LAISSER RESPIRER VOS ESPACES CONFINÉS

Ideal for long-term storage, Ripack Supplies self-adhesive ventilation grids allow air to circulate beneath the shrinkwrap. The air vents create draughts, preventing odors, humidity and mold.

Vents allow to ventilate the boat and equipment under their shrinkwrap cover. Essential for long-term storage

Ripack Supplies vents are self-adhesive and easy to install: after cutting the shrinkwrap to the grid size, adhesive vents are simply stuck to this place to clean the air in your confined space.

Placed on either side of a winterized boat or shrinkwrap-protected equipment every 2 meters, ventilation grids let your confined spaces or equipment breathe.
