

WIDE SHRINK-WRAP
 THE EXPERTISE OF LARGE BUILDING SITES

No need to waste time trying to shrink poor quality films. No need to choose between price and quality, opt for the Ripack Supplies range!

Work with total peace of mind with the Ripack Supplies range of shrink-wrap. The result of an in-depth study directly related to the expectations of installers and operators. Combined with the Ripack shrink gun, no unmelted areas and great flexibility for optimal shrink quality.

In order to meet all your needs, Ripack Supplies offers a range of shrink-wrap from 4 to 15 metres. The shrink-wrap varies in thickness from 180 to 210 microns depending on its width.

It has a wide range of applications, from protecting a boat during overwintering and transport to buildings, containers or even industrial goods.

The excellent quality of our shrink-wrap ensures bi-directional shrinking and an excellent hold when sealed.
