

## STRAPS, TENSIONER AND BUCKLES

FOR EASY AND OPTIMAL POSITIONING OF YOUR SHRINK FILM

To ensure that the film stays in place during transport or outdoor storage, it is essential to secure the protection with a flexible, robust and non-aggressive textile strap. This will make it easier to apply and shrink the film by blocking it before it is heated and shrunk.

To properly strap your boat, it is essential that the straps are correctly tightened. To do this, you'll need strapping buckles and a tensioner.

These galvanised steel buckles lock the textile strapping to the tensioner. They are essential to hold strapping perfectly in place. Adapted to our two strap widths, they are very easy to use.

To tense the straps easily, you can use our tensioner. It is robust, easy to use and small, so it is easy to handle in tight spaces. You'll be able to tension your straps safely and effortlessly.

### TECHNICAL TABLE

	Straps		Buckles		Tensioner
<b>Item code</b>	Strap13x1000	Strap19x480	Buck13	Buck19	ToolStrap
<b>Widths</b>	0,5" 13mm	0,7" 19mm	0,5" 13mm	0,7" 19mm	Suitable
<b>Lengths</b>	3281 ft 1000m	1575 ft 480m
